

Resource Clearinghouse

Sustainable Delmarva's Resource Clearinghouse program is currently being developed and will provide the necessary resources for communities to take action on their vision – free of charge. Services include:

- A comprehensive resource page on the Sustainable Delmarva website (to be completed by late spring 2010) that includes relevant data about the Delmarva Peninsula, contact information of organizations and agencies that offer services often sought out by communities, as well as, websites and articles that help communities move ahead with their identified action steps.
- Expertise from Sustainable Delmarva associates ranging from how to organize a community meeting that matters, to effectively communicating with other stakeholders, to everything in between.
- Introduction sessions to World Café and Future Search for action groups thinking about holding a follow up conference as part of the their action steps

For more information about this program contact Jennifer Hicks jhicks@sustainabledelmarva.net
